

Estimation of F

3

2

$$F = \frac{H_E - H_O}{H_E}$$

$$= 1 - \frac{H_O}{H_E}$$

Estimate of F is 'relative' to the expected frequency of heterozygotes under HWE

Estimation of F

$$\begin{aligned} F &= \frac{H_E - H_O}{H_E} \\ &= 1 - \frac{H_O}{H_E} \end{aligned}$$

Estimate of F is 'relative' to the expected frequency of heterozygotes under HWE
