

Rogers Distance

$R_2, x$

*R2, y*

$R_1, y$

$p_1, x$

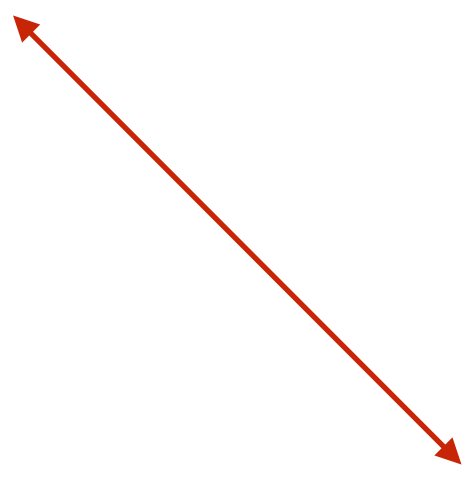

$$D_R = \sqrt{\frac{1}{2} \sum_{i=1}^{\ell} (p_{i,x} - p_{i,y})^2}$$

# Rogers Distance

$$D_R = \sqrt{\frac{1}{2} \sum_{i=1}^{\ell} (p_{i,x} - p_{i,y})^2}$$

# Nei's Distance

$$I = \frac{\sum_{i=1}^L \sum_{j=1}^{\ell_i} p_{ij,x} p_{ij,y}}{\sqrt{\sum_{i=1}^L \left( \sum_{j=1}^{\ell_i} p_{ij,x}^2 \right) \sum_{i=1}^L \left( \sum_{j=1}^{\ell_i} p_{ij,y}^2 \right)}}$$

OMG!!!!  
Are you kidding me?
