Resources Available

An associated text entitled, *Landscape Genetic Data Analysis* is provided for in HTML format. Source for this is deposited at github.com/dyerlab and is available under a CC SA-BY license.

- Follows the slide content with a bit more depth.

- Provides both examples of application as well as practical exercises.

Expectations

At the end of this workshop, you should be feel comfortable working with both spatial and genetic data in a way that is consistent with common Landscape Genetic studies.

- Each day there is an opportunity to expand on topics as well as play with your own data if necessary.
